To supplement the Handbook on the Suggestion/Invention Program which we send Committee and Panel Members, we furnish copies of articles acquired from National Association of Suggestion Systems Conferences, publications, and other sources from time to time.

Past Committee and Panel Members have found most of the articles quite interesting and valuable for a more complete knowledge of our program. One Committee Member told me that one of these articles "motivated" him to write a staff paper recommending inauguration of a certain Agency project.

The articles are unclassified, and perhaps ideal for after hours reading. We invite you to add them to your library.
